

1-2 and 5-7 of the specification. In particular, the chemical formulae visually describe the synthesis of a (3S,5S)-pyrrolidylthiocarbapenem derivative. Moreover, the specification as a whole provides support for the above-described amendments.

In the event minor issues remain in this application, Applicants request the Examiner call the undersigned attorney. If any fees are required for the filing of these papers, Applicants request the Commissioner to charge those fees to deposit account #18-0988.

Respectfully submitted,

RENNER, OTTO, BOISSELLE & SKLAR
